DESIGNER DOORS

ABOUT CAMBEK™

In the 1980s an astute and curious garage door dealer in Minneapolis observed that many newer wood doors he had recently replaced were falling apart, while much older wood doors seemed to retain their integrity.

What made the solid old wood doors resist rotting and sagging? How did they withstand the extreme weather conditions? Answers weren't obvious. So he dismantled the doors — the new doors and the old doors, and the answer was revealed: the old doors had a solid douglas fir frame along with superior construction techniques.

The founder of what was then Designer Doors® began working with architects to create beautiful custom wood garage doors. Soon architects and homeowners were asking for matching walk-through and service doors, shutters, and garden gates to complement their custom garage doors. Now Cambek™ Designer Doors® proudly continues to carry on this legacy of superior quality and traditional craftsmanship.

INSPIRED GARAGE DOOR DESIGNS

CUSTOM GARAGE DOORS

Custom, one-of-a-kind garage doors that match your exact vision and fit seamlessly into your home.

- 100% customizable: no two doors are built the same
- Made from authentic red western cedar and other premium materials

BEST PRICE

CUSTOM GARAGE DOORS

Meet the fusion of timeless beauty and sturdy construction.

CAMBEK™ Designer Doors are exquisitely designed and masterfully built, culminating in a garage door that will last a lifetime. Our craftsmen carefully select the finest materials and shape them into fully customizable garage doors that capture your unique vision and elevate the look of any home. Simply provide your dream design and we'll make it a reality.

SPECIALTY GARAGE DOOR OPTIONS:

CUSTOM GARAGE DOORS

CARRIAGE STYLE DOORS

Authentic, historically accurate, and truly inspired, CAMBEK Carriage Style doors complement the distinctive architectural features of 18th and 19th-century homes. With designs that replicate doors that traditionally slide, swing, or fold open, these carriage style doors blend form and function to create architecturally-accurate doors complete with modern benefits.

WALK-THROUGH DOORS

CAMBEK offers three custom options for walk-through doors:

- Complementary Walk-Through Doors: detached entry doors that do not obstruct the primary overhead door from opening.
- Integrated Walk-Through Doors: independently opening doors that exist in the same frame as the overhead garage door.
- Wicket Doors: independently opening doors that are built directly into the overhead garage door itself.

CUSTOM GARAGE DOORS

HURRICANE RATED DOORS

CAMBEK Hurricane Rated Doors are specially built to withstand the rigors of coastal and storm-prone regions. Featuring impact-rated glass glazing and a patented wind load-rated design, all doors in this fully customizable line are tested with nationally recognized protocols and standards, including both the Miami-Dade County Notice of Acceptance and the Florida Building Code product approval, two of the toughest and most stringent building codes.

HURRICANE RATED DOORS

BEAUTY MEETS BRAWN.

CUSTOM-BUILT HURRICANE RATED DOORS FOR COASTAL HOMES

Fully customizable, built with the finest materials, and featuring a patented (U.S. Patent 7,299,853) design specifically made for hurricane-prone areas, CAMBEK™ hurricane-rated doors set the industry standard for durability, moisture control, and beauty in their unique designs.

CAMBEK doors fuse timeless beauty with superior protection against high wind loads, extreme pressure changes, moisture, and anything else nature can bring down on them! They are meticulously designed and expertly built using time-honored woodworking techniques, making them the perfect addition to any coastal home.

THE ULTIMATE PROTECTION PLAN IS NOT A WARRANTY, IT'S A DESIGN FEATURE

CAMBEK all-wood garage doors are built to last a lifetime. They are made with sturdy Douglas-Fir frames, impact-rated glass glazing, a nano-technology finish that repels moisture, and many other features that help them withstand nature's fury.

Custom Hurricane Door

Hurricane Door with Windows

HURRICANE RATED

BUILT FOR (WIND) SPEED

When severe weather comes, it's essential that your doors can withstand high winds and extreme pressure changes. CAMBEK doors are engineered to withstand wind speeds of up to 150 mph. They exceed the requirements of the most stringent and nationally recognized protocols and standards—including the Notice of Acceptance in Miami-Dade and Broward County and the Florida Building Code product approval.

WET GLAZED IMPACT GLASS WINDOWS

Each piece of impact-resistant glass is designed to withstand flying debris and strong winds. Every window is held firmly in place by a bead of sealant and features a wet-glazed surface, keeping air and water out of the garage space and preventing it from seeping into and degrading the interior of the door.

WINDLOAD RATING OPTIONS

Design	Wind Speed	Design Pressure	Width	Height
Hurricane H-1 140 Impact - No Glass	130 - 150 mph	+48/-65	10' 6" Max	12' Max Over 8' w/approval

HURRICANE RATED

NANO TECHNOLOGY STAIN FINISH

CAMBEK's three-coat, water-based stain finish is extremely flexible and will not crack, flake, chalk, blister, or lift from wood substrate when applied. It provides optimum protection against the weather, allowing wood to withstand direct exposure to rain, snow, sunlight, and moisture, while still allowing the wood to breathe. Nanoparticulates within the finish allow for superior UV resistance and greater color stability. Choose from multiple stain colors. Custom color matching is available.

POWDER COATED HARDWARE AND TRACK

All galvanized steel track and custom hardware can be powder coated to protect against the high humidity and salty environments of coastal states. Cast aluminum and powder coated decorative hardware creates the authentic appearance of wrought iron hardware while reducing weight and increasing resistance to natural elements. Powder coated tracks also reduce the noise created by door operation. CAMBEK offers four standard powder coat colors: Shadow Black, Charlie Brown, Cinnamon Brown, and White. Custom RAL colors are also an option if the goal is to match the hardware to a specific interior finish color.

Custom Hardware

Modern Hurricane Door

All voids between material layers are filled with clear DAP acrylic caulking prior to being finished.

The back side of all trim board material is back sealed prior to application on the door.

All six sides of the internal Douglas Fir frame of the bottom section are sealed prior to being assembled.

All ends of the trim boards that do not terminate at a section break are sealed before application on the door.

The back side of all tongue and groove material is back sealed prior to application on the door.

The entire routed out area of the embedded drip cap is sealed prior to setting the drip cap.

Borate rods, which deter fungal decay and insects, are embedded into the Douglas Fir frame before the millwork and trim boards are applied.

1 3/8 Polystyrene foam insulation.

HURRICANE RATED

SUPERIOR MOISTURE MANAGEMENT

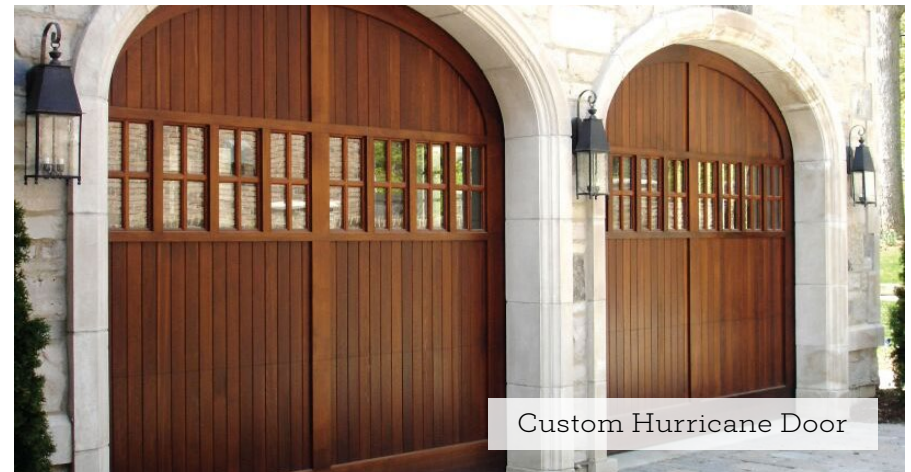

Everything from the internal components to the exterior millwork and finish of CAMBEK doors help shield against damage from lingering moisture and persistent humidity.

Beveled trim board under the lite sections: sheds water and prevents pooling and potential leakage into the door's interior cavity, maximizing the longevity of the door.

Vent Holes: holes drilled into each section of the door's interior facilitate the natural movement of moisture within the door caused by temperature and humidity changes. This prevents moisture from building up within and damaging the door's interior cavity.

Integrated Drip Cap: a beveled moulding recessed into the surface material along the top edge of the bottom trim board. The drip cap prevents water from pooling on the bottom board and seeping into the doors, thus minimizing the possibility of mold or wood rot.

No exposed vertical end grain on the bottom of the door: a horizontal cap board seals off the end grain of the tongue and groove surface material and prevents wicking of rain and snow moisture.
